Alex Morgan

Senior Cloud & DevOps Engineer

Pune, India | alex@example.com | github.com/alex-morgan

PROFESSIONAL SUMMARY

Cloud and platform engineer focused on reliable infrastructure, automated delivery, and production AI systems. Combines hands-on engineering with cross-functional leadership to simplify operations and improve release quality.

TECHNICAL SKILLS

Cloud & Infrastructure: Azure, AWS, Kubernetes, Terraform, Helm

Delivery & Automation: Azure DevOps, GitHub Actions, Jenkins, Ansible

Languages & Services: Python, Go, Bash, FastAPI, PostgreSQL

Observability: Prometheus, Grafana, OpenTelemetry, ELK

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer | Example Technologies

January 2023 - Present

- Designed reusable infrastructure modules for cloud environments, standardizing network, security, and application deployment patterns across engineering teams.
- Built automated release pipelines with integration tests and staged deployments, reducing manual release work and improving service reliability.
- Partnered with application engineers to diagnose performance issues and define practical service-level objectives.

Cloud Engineer | Example Systems

June 2020 - December 2022

- Containerized backend services and introduced consistent development environments for distributed teams.
- Implemented centralized monitoring and actionable alerts, supported incident reviews, and documented recovery procedures.

SELECTED PROJECTS

Production AI Platform

Technologies: Kubernetes, Python, Terraform, Azure DevOps

- Established a repeatable deployment workflow for AI services, including configuration management, monitoring, and controlled model updates.
- Worked with data scientists to improve service interfaces and simplify production troubleshooting.

EDUCATION

B.Tech in Computer Science | Example Institute of Technology

2016 - 2020

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate
- Certified Kubernetes Administrator
